JOURNAL OF OPTIMIZATION THEORY AND APPLICATIONS: Vol. 26, No. 4, DECEMBER 1978

Subject Index to Volume 26

Algorithms, 205
Augmented Lagrangian method, 485

Banach spaces, 379
Bibliography, 325
Bounded control, 395
Bounded state, 395

Calculus of variations, 373, 601
Chemical equilibrium, 77
Cold mill, 427
Comparison of algorithms, 205
Comparisons, 185
Compartment models, 581
Computation, 185
Computing methods, 205, 395
Conjugate-direction methods, 465
Conjugate-gradient methods, 427
Conjugate transform, 43
Constrained duality, 43
Control theory, 117
Controllability, 379
Convergence rates for optimization algorithms, 367
Convex analysis, 117
Convex programming, 51, 59, 367, 581
Convexity, 379
Cooling towers, 305

Decentralized control, 351
Descent algorithms, 367
Descent methods, 427
Differential games, 645
Distributed parameter systems, 645
Distributive computing, 351
Dual cone, 43
Duality, 15, 59, 77, 117; 243, 265
Duality theory, 581

Efficient points, 569
Engineering design, 305
Extremality conditions, 15

Feedback control, 645
Fenchel's duality theorem, 51
Functional analysis, 427
Functional derivatives, 373
Functional extrema, 373

General boundary conditions, 395
Generalized geometric programming, 15, 51, 117
Generalized reduced gradient method, 253
Geometric Lagrangian, 15
Geometric programming, 3, 43, 59, 77, 149, 185, 243, 265, 277, 291, 305, 325
Geometric programming algorithms, 205
Geometric programs, 253
Global minima, 97
Gradient methods, 395
Gradient-restoration algorithms, 395

Hadamard product, 351

0022-3239/78/1200-0665$05.00/0 © 1978 Plenum Publishing Corporation

Impulsive control, 581
Interval arithmetic, 277

Kuhn–Tucker conditions, 3
Kuhn–Tucker theorem, 51
Kuhn–Tucker vectors, 15

Leader–follower decision making, 637
Load optimization, 351
Local variations, 373

Mathematical programming, 465
Maximum principles, 533
Method of multipliers, 485
Minimax problems, 379
Modeling, 427
Multiplier method, 515

Necessary conditions, 533
Newton-like methods, 453
Newton–Raphson method, 485
Nonconvex programming, 97
Nondifferential constraints, 395
Nonlinear functional equations, 427
Nonlinear programming, 3, 149, 185, 243, 253, 305, 485, 515
Nonlinear vector maximization, 569
Nonzero-sum games, 637
Numerical integration, 453
Numerical methods, 205, 395

Optimal control, 395, 457, 463
Optimal design, 305
Optimal engineering design, 291
Optimality conditions, 3
Optimization, 253, 453, 601
Optimization theory, 533
Ordinary Lagrangian, 15
Ordinary programming, 3, 51
Orthogonal trajectories, 453

Posynomial functions, 97
Posynomials, 305
Projections, 59
Proper efficiency, 569
P-vectors, 15

Quadratic convergence, 501, 515
Quadratic programming with equality and inequality constraints, 351
Quasiconcave functions, 97
Queueing systems, 457, 463

Reachability, 379
Reconstructed support functions, 379
Reduced gradient method, 265
Redundancy, 351
Restrictions, 59
Roll gap relationships, 427

Saddle points, 15
Second-order conditions, 501
Sequential gradient–restoration algorithms, 395
Signomial programming, 149, 277, 291
Singular cost criterion, 351
Slack variables, 515
Slater condition, 59
Slater's constraint qualification, 51
Software, 149
Stackelberg strategies, 637
State constraints, 601
State of the art, 149
Structural design, 291

Subsidiary problems, 243
Superlinearly convergent algorithms, 465

Team decision problems, 351
Test problems, 205
Transcendental geometric programming, 77

Unconstrained duality, 43
Unconstrained optimization, 501
Unconstrained minimization without calculating derivatives, 465

Variational derivatives, 533
Variational sets, 533
Vector maximization, 569
